Eluru ,Andhra Pradesh

OBJECTIVE

A dedicated and enthusiastic student of Computer Science Engineering, possessing strong analytical capabilities and a comprehensive foundation in web development. Committed to employing advanced technologies to address real world problems, with an unwavering dedication to ongoing learning, innovation, and collaborative efforts. Aspires to apply problem solving skill, creativity, and technical proficiency in dynamic settings to significantly contribute to the advancement of the organization.

EDUCATION

- **Sir C R Reddy College of Engineering** Sep 2023 - May 2026
B.Tech in Artificial Intelligence and Data Science
◦ **GPA: 7.6/10 (Tillnow)** Eluru
- **SMT.B. Seetha Polytechnic** April 2023
Diploma in Computer Engineering Bhimavaram
◦ Percentage: 85

PROJECTS

- **AI-Powered Traffic Optimization** Oct 2024
Tools: Numpy,Pandas,tensorflow,keras,scikit-learn 
◦ Designed and trained deep learning models with TensorFlow and Keras to capture complex temporal dependencies in traffic data for enhanced prediction accuracy.
- Applied data cleaning and feature engineering techniques using Pandas to prepare traffic data for machine learning model training, ensuring data quality and relevance.
- **Web-Based Data Visualization Dashboard** Mar 2025
Tools: HTML,CSS, JavaScript,Nodejs,Reactjs 
◦ Developed a web-based data visualization tool enabling users to upload Excel files and instantly generate diverse 2D and 3D graphs.
- Streamlined data interpretation by providing intuitive conversion of raw spreadsheet data into interactive visual representations.
- Enhanced user accessibility to complex data analysis, facilitating clearer insights and better decision-making through dynamic graphing capabilities.

SKILLS

- **C Language, Python, SQL, MongoDB .**
- **Web Technologies:** HTML, CSS, Javascript, ReactJS
- **Data Science & Machine Learning:** Pandas, Numpy, TensorFlow, Pytorch, keras, MatpltLib
- **IDE and Tools:** Visual Studio Code, Google Colab Jupyter Notebook, GitHub
- **Other Skills:** Communication skills, Problem Solving, Time Management, Software Design Patterns.

INTERSHIPS

- **Full Stack Java Intern** May 2024 - June 2024
SkillDzire (virtual)
◦ Built a full-stack Grocery Management Store app using Java, Spring Boot, and MySQL
- Created responsive front-end with HTML, CSS, and JavaScript for seamless user experience.
- Integrated RESTful APIs for efficient inventory and order management features.
- Optimized database queries and performance through team collaboration.
- **Web Development Intern** May 2025 - July 2025
Zidio Development (virtual)
◦ Developed a full-stack Excel analytics platform using MERN stack with support for 2D/3D chart generation (Chart.js, Plotly).
- Implemented secure JWT-based user/admin authentication and integrated Excel file upload with dynamic data mapping.
- Integrated downloadable reports (PNG/PDF) and optional AI-based summary insights using external APIs.

LEADERSHIP EXPERIENCE

- **Hosted TechFest**

march 2025

Sir C R Reddy College Of Engineering

- Served as Coordinator for Celestra 2K25 Techfest in March 2025, overseeing event planning and execution.
- Managed technical and non-technical events, including paper presentations, code debugging, and treasure hunts, ensuring smooth operations.
- Coordinated with teams to promote participation, handle logistics, and enhance attendee experience.

ADDITIONAL INFORMATION
